

Automatic Bobbin Winder

Alpha mate F117

It can be used by anyone with simple operation. Once set, it is an automatic machine that can be driven unattended, so workers can concentrate on sewing work with peace of mind.

The upper cover uses a semitransparent acrylic resin plate, and you can also check the inside during operation.

We perform superb thread cutting with character by opening and closing female of original design.

Since the digital auto counter is incorporated, if the scheduled winding number is set in advance, the number of bobbins currently being wound is automatically displayed and it will stop automatically when the expected number is reached
